All classes free and open to the public.

No registration required unless stated in description. No late entry.
ADA accommodations available upon advance request.
Call us at 720.865.1706 or email ctc@denverlibrary.org.

3D Printing & Modeling Basics

We'll teach you how to use free 3D modeling software (available at tinkercad.com) to create objects that can be 3D printed or even used in video game creation.

Clean Up & Speed Up Your Computer

Come learn how to remove programs, manage the space on your computer, speed up your browsing and more.

Coding Basics

Join us as we explore basic principles fundamental to every coding language through hands-on activities and games. No coding experience required.

Class 1: Get familiar with basic coding concepts and terminology.

Class 2: Build on knowledge of basic concepts to explore logic and structure common to all coding languages.

Computer Basics: Email 1

Learn how to send and receive email, manage your inbox, and practice downloading and attaching files. Students may also receive help signing up for a Gmail account at the end of class.

Computer Basics: Email 2

Learn how to clean up your email inbox, protect against spammers, create folders to organize emails, and practice attaching a file to an email and downloading attachments that have been sent to you.

Computer Basics: Getting Started

Learn the basics of using a computer and practice using a mouse. No computer experience required.

Computer Basics: Internet 1

Learn how to use a browser to access the internet, and use Google to find information on the internet.

Computer Basics: Internet 2

Building on the skills from Internet I, practice using Google to find the information you need from websites you can trust.

Computer Basics: Saving & Finding Files

In this class we'll learn how your computer is organized and how to find what you're looking for.

DPL Photographers Guild

The DPL Photographers Guild meets every third Tuesday to discuss photography, cameras, photographic history, alternative approaches to image making, and more. Each session will feature a different lesson or workshop as well as time to share your images, ask questions, and give and receive feedback.

Drop In Tech Help

If you have questions about navigating the web, social networks, your phone or tablet, eBooks, and more, drop by to get help and learn how to use tech more effectively.

Editing Video with Adobe Premiere Elements

This workshop will cover basic video editing skills and get students familiar with Adobe's editing software, Premiere Elements. The class will focus on learning the interface, basic tools, file management and editing tips. Upon completion of this course, students will have a thorough introduction to Premiere Elements as well as hands-on experience with basic video editing best practices. Taught by instructors from Denver Open Media.

Fix & Mend Meetup

Bring your faulty lamp, torn pants, or other broken objects to this drop-in repair lab where we will work together to help you try to fix your items. This is a collaborative, social gathering and interested tinkerers are welcome to join as well!

Girls Who DIY

Join us for a hands-on exploration of all things maker. We will work on projects involving everything STEAM: coding, robotics, web design, 3D printing, sewing, soldering, and more. Ages 12-18.

ideaLAB Tour

ideaLAB is the library's makerspace. Visit the ideaLAB to check out our equipment and software and learn how you can make videos, games, music, art, crafts, and more.

Learn to Code Meetup

An open house/study group for anyone, at any level, with any interest in computer programming. Check out www.meetup.com/learntocodedenver for more details.

Light Up Valentines

We'll use copper tape, LEDs, and coin batteries - along with all of our fancy paper-folding skills - to make a lit-up papercraft valentine.

Marketing With Social Media

Social media is a powerful tool for getting the word out, whether you're selling a product, promoting an event or raising awareness about something. This class will teach you to tap into the power of Facebook, Twitter, blogs and personal websites to get your message across.

Microsoft Excel: Basics

Excel spreadsheets allow you to easily store, organize and manipulate data. Learn the basics of Excel (inserting text, basic formulas, AutoSum, AutoFill, and more) by creating a personal budget and making Excel do all the math for you.

Microsoft Word: Advanced

Learn how to use the Mail Merge Wizard to personalize letters and envelopes. We also cover how to insert images and proofread like a pro with the Track Changes feature. Intermediate Word skills required.

Microsoft Word: Basics

Learn how to create and edit a document with Microsoft Word. We will cover basic formatting options like how to bold text, adjust line spacing, and change the page alignment.

Microsoft Word: Intermediate

Microsoft Word has many tools that make working on long documents a snap! Learn about styles, headers, footers, page numbers, and tables. Basic Word skills required.

Microsoft Word: Resumes

Whether you already have a resume or need to start from scratch, come learn how to use Microsoft Word to create a professional looking resume using basic and advanced formatting tools. Basic Word skills required.

Python

Python is a general-purpose programming language that's used for web development, task automation, data analysis, and a wide-range of software development. It's a highly desirable skill and a great place to start programming. No previous programming experience required, but you need to have intermediate computer skills to attend.

Class 1 Variables, Expressions, and String Format Operators

Class 2: Prompts and Conditionals

Class 3: Loops and Functions

Class 4: Lists, Tuples, Dictionaries, Classes, and Objects

VBA Programming for Excel

Do more with Excel using Visual Basic! While no coding experience is required, familiarity with Excel macros is a plus.

Class 1: Learn how to create subroutines, variables, and use conditionals to increase the functionality of VBA.

Class 2: Learn about loops and advanced conditionals to create more powerful programs.

YouTube Basics

YouTube is the most popular online video streaming service in the world. Come learn about channels, subscriptions, playlists, and uploading your own videos to YouTube.

CAN'T MAKE IT TO CLASS? NEED EXTRA HELP?

Call us at 720.865.1706 or email ctc@denverlibrary.org to set up a one-on-one tech help appointment.
