All classes free and open to the public.

No registration required unless stated in description. No late entry.

Blockchain Meetup

Discuss the technology that makes cryptocurrencies like Bitcoin possible.

Build a Brand: Marketing with Social Media

Learn effective strategies to market your business on Facebook, Twitter, and other social media platforms.

Coding Basics

Explore basic principles fundamental to every coding language through hands-on activities and games. No coding experience required.

Class 1: Basic coding concepts and terminology

Class 2: Logic and structure common to all coding languages

Computer Basics: Email

Learn how to send and receive email, navigate your inbox, and practice downloading and attaching files.

Computer Basics: Getting Started

Learn the basics of using a computer and practice using a mouse. No computer experience required.

Computer Basics: Internet

Learn how to use a browser to access the internet and use Google to find information on the internet.

Computer Basics: Saving & Finding Files

Learn how your computer is organized, including files and folders, and discover how to find what you're looking for.

CSS Basics

Learn what CSS is and start styling backgrounds, text and fonts. Basic HTML skills required.

DPL Photographers Guild

The DPL Photographers Guild meets every third Tuesday to discuss photography, cameras, and more. Each session features a different lesson as well as time to share your images, ask questions, and give and receive feedback.

Drone Fundamentals with ThunderBird Drones

Drone Fundamentals will provide a basic overview of drone technology, applications (private, commercial, and military), legal and safety regulations surrounding the industry, as well as outlook for future applications (impending drone delivery, healthcare uses, and more).

Drop In Tech Help

If you have questions about navigating the web, social networks, your phone or tablet, eBooks, and more, drop by to get help and learn how to use tech more effectively.

Fix & Mend Meetup

Bring your faulty lamp, torn pants, or other broken objects to this drop-in repair lab where we will work together to fix your items. This is a collaborative, social gathering: tinkerers are welcome to join.

Google Calendar Basics

Learn how to use Google's online calendar for effective time management, sharing event information, invites, notifications and more. Must have email address to attend this class.

HTML Basics

Build web pages from scratch with HTML. Learn what HTML is and use it to format text, insert images and create links.

ideaLAB Tour

ideaLAB is the library's makerspace. Visit the ideaLAB to check out our equipment and software and learn how you can make videos, games, music, art, crafts, and more.

Light Up Halloween Card

We'll use copper tape, LEDs and coin batteries to make a lit-up papercraft card - just in time for Halloween.

Microsoft Excel: Basics

Excel spreadsheets allow you to easily store, organize and modify data. Learn the basics of Excel (such as inserting text, basic formulas, AutoFill and more) by creating a personal budget.

Microsoft Word: Advanced

Learn how to insert images and other objects into Microsoft Word documents. Intermediate Word skills required.

Microsoft Word: Basics

Learn how to create and edit a document with Microsoft Word. You'll learn basic formatting options like how to bold text, adjust line spacing and change the page alignment.

Microsoft Word: Intermediate

Microsoft Word has many tools that make working on long documents a snap. Learn about styles, headers, footers, page numbers and tables. Basic Word skills required.

Photoshop Basics

Photoshop is a powerful all-purpose photo editing and art creation tool. In this class we'll learn about lighting and color corrections, cropping and scaling photos, fixing blemishes and doctoring photos, and layer manipulation.

Protecting Your Privacy Online

Learn how to limit what's shared about you online. Find out how browser plug-ins, proxies, and the Tor browser can help keep your information private.

Sewing Circle

Bring your sewing project and join other crafters in conversation.

Tech Career Talk

Explore careers in technology. Hear from a local software developer. The informal presentation will be followed by audience Q&A.

Technology for Presentations

Learn how to improve your presentation while using PowerPoint and other presentation software. Explore best practices for designing and delivering your presentation and get hands-on experience.

Viruses & Malware Basics

Learn about malware threats, how to tell if a computer is infected, and how to install and use a high quality free antivirus program.

WordPress Happiness Hour

Get the answers to your WordPress questions in an open forum hosted by WordPress experts.

WordPress.com

Learn to create your own blog or basic website with WordPress.com. Note: these classes cover WordPress.com (not WordPress.org).

Class 1: Learn to navigate; make pages and posts; add photos; and customize the appearance of your website.

Class 2: Explore creating static homepages, contact forms, custom menus, and photo galleries. Add additional users, manage comments, and integrate social media on your website.

CAN'T MAKE IT TO CLASS? NEED EXTRA HELP?

Call us at 720.865.1706 or email ctc@denverlibrary.org to set up a one-on-one tech help appointment.

If you need sign language or CART Services, contact SignLanguageServices@denvergov.org with at least a three (3) business day notice. For other public accommodation requests / concerns related to a disability, please contact DisabilityAccess@denvergov.org.
