[ denverlibrary.org/ctc ]
3D Print a Keyring
Use free 3D modeling software to design a personalized keyring. After creating your design, your 3D model will be printed in about 1-2 weeks.

Clean Up & Speed Up Your Computer
Learn how to remove programs, manage the space on your computer, speed up your browsing and more.

Coding Basics
Explore basic principles fundamental to every coding language through hands-on activities and games. No coding experience required.

Computer Basics: Email
Learn how to send and receive email, navigate your inbox, and practice downloading and attaching files.

Computer Basics: Getting Started
Learn the basics of using a computer and practice using a mouse. No computer experience required.

Computer Basics: Internet
Learn how to use a browser to access the internet and use Google to find information on the internet.

Computer Basics: Saving & Finding Files
Learn how your computer is organized, including files and folders, and discover how to find what you're looking for.

Create a Logo
Create your own digital illustrations and designs. Learn the basics of Inkscape, a free vector graphics program, and create an example logo you can use in print or online.

Drop In Tech Help
If you have questions about navigating the web, social networks, your phone or tablet, eBooks, and more, drop by to get help and learn how to use tech more effectively.

ideaLAB Open Lab
ideaLAB is the library's makerspace! During open lab, you can try out a variety of hardware and software to create music, games, 3D designs, art and much more. Bring your own ideas and projects - there are staff to help you get started.

Marketing With Social Media
Social media is a powerful communication tool. In this class, we will learn how to get started with Facebook, Instagram and Twitter.

Microsoft Access Basics
Access lets you create and manage databases. In this class you get a broad overview of the core features of Access, such as how to store data, make queries, design forms, and generate reports.

Microsoft Excel: Basics
Excel spreadsheets allow you to easily store, organize and modify data. Learn the basics of Excel (such as inserting text, basic formulas, AutoFill and more) by creating a personal budget.

Microsoft Word: Advanced
Learn how to insert images and other objects into Microsoft Word documents. Intermediate Word skills required.

Microsoft Word: Basics
Learn how to create and edit a document with Microsoft Word. You'll learn basic formatting options like how to bold text, adjust line spacing and change the page alignment.

Microsoft Word: Long Documents
Microsoft Word has many tools that make working on long documents a snap. Learn about styles, headers, footers, page numbers and tables. Basic Word skills required.

Photoshop: Retouch Old Photos
Preserve any old photographs, negatives, or slides by making them digital! You will learn how to use Photoshop to remove creases/dust, adjust lighting and color, and add hand-painted effects to black and white images.

Protecting Your Privacy Online
Learn how to limit what's shared about you online. Find out how browser plug-ins and proxies can help keep your information private.

Python
Learn basic Python, a beginner-friendly computer programming language. No previous programming experience required.

Class 1: Variables, Data Types and Expressions
Class 2: Format Operators, Input and Conditions
Class 3: Functions and Loops
Class 4: Classes, Objects and Modules

Search Engine Optimization Basics
Learn about Search Engine Optimization (SEO). Debunk SEO myths, and learn basic tools and tips to help improve your website's online presence.

Viruses & Malware Basics
Learn about malware threats and how to protect your computer or smartphone. Explore reliable free antivirus and anti-tracking programs.

WordPress Happiness Hour
Get the answers to your WordPress questions in an open forum hosted by WordPress experts.
